

Governance Foundations Package

Stop managing M365 by accident.

Shane McCaw Consulting

Lead Microsoft 365 Architect

shanemccaw.com/micro-offers/governance-foundations

June 23, 2026

OVERVIEW

A complete Microsoft 365 governance framework built to enterprise and regulated-industry standards, including policies, templates, and training.

WHAT'S INCLUDED

Assessment & Discovery

- Governance maturity assessment

Strategy & Roadmap

- Full governance framework
- Governance design

Governance & Security

- Policy template suite
- 90-minute governance training
- Policy templates

Training & Enablement

- Training session

Additional Deliverables

- Maturity scoring

ENGAGEMENT PHASES

Discovery & Governance Intake

Understand current governance posture, challenges, and organizational requirements

- Conduct governance intake workshop
- Review current Teams, SharePoint, and M365 governance policies
- Identify compliance, security, and lifecycle requirements
- Document current pain points and governance gaps
- Governance intake summary
- Current-state governance map
- Governance intake package

Information Architecture Review

Analyze structure, navigation, and content organization across Teams and SharePoint

- Review site architecture and hub structure
- Analyze content sprawl and ROT (redundant, outdated, trivial) content
- Evaluate navigation and taxonomy alignment
- Review Teams-to-SharePoint mapping
- IA assessment report
- Content sprawl analysis
- IA recommendations summary

Security & Compliance Review

Evaluate security, compliance, and data protection controls

- Review sensitivity labels and label policies
- Analyze DLP policies and enforcement
- Review retention labels and retention policies
- Evaluate external sharing and guest access settings
- Review Conditional Access and identity governance alignment
- Security & compliance assessment report
- External sharing risk summary
- Security & compliance recommendations

Governance Framework Design

Build the governance model for Teams, SharePoint, and Microsoft 365

- Define Teams lifecycle governance (creation, naming, expiration)
- Define SharePoint site governance (templates, ownership, lifecycle)
- Define content governance (metadata, taxonomy, retention)
- Define security governance (permissions, access reviews, guest access)

- Define operational governance (roles, responsibilities, processes)
- Governance framework document
- Governance process diagrams
- Governance framework package

Implementation Planning

Translate governance framework into an actionable rollout plan

- Build phased implementation roadmap
- Define technical configuration tasks
- Define communication and change management needs
- Identify dependencies and required roles
- Implementation roadmap
- Configuration checklist
- Implementation plan summary

Handoff & Documentation

Deliver final governance package and transition ownership

- Compile final governance documentation
- Provide admin training on governance processes
- Upload governance package to client portal
- Close project in workflow engine
- Final governance framework
- Training materials
- Governance handoff package

KEY FEATURES

- Audit-ready
- Enterprise-grade
- Compliance-focused
- Scalable governance

INVESTMENT

\$12,000 - \$18,000 USD

Typical engagement: 6 weeks

Price may vary based on complexity, scope, and organizational size.

Expedited delivery available upon request.

WHY THIS SERVICE MATTERS

Organizations preparing for audits or experiencing Teams/SharePoint chaos.
