June 23, 2026

OVERVIEW

A complete readiness evaluation to ensure your Microsoft 365 environment is secure, governed, and prepared for Copilot deployment.

WHAT'S INCLUDED

Documentation & Reporting

- Copilot readiness report

Strategy & Roadmap

- Prioritized rollout plan
- Quick-win recommendations
- Pilot group design + success metrics
- Rollout roadmap

Assessment & Discovery

- Data governance review
- Permissions analysis

Additional Deliverables

- Licensing readiness

ENGAGEMENT PHASES

Discovery & Access Validation

Understand Copilot goals, validate access, and confirm assessment scope

- Conduct Copilot readiness discovery workshop
- Identify Copilot use cases and business priorities
- Validate admin access and required permissions
- Review licensing and Copilot SKU distribution
- Document compliance, security, and data protection requirements
- Copilot readiness intake summary
- Licensing and access validation report
- Discovery package for customer review

Identity & Access Review

Evaluate identity, authentication, and access controls required for safe Copilot deployment

- Review Conditional Access policies for Copilot compatibility
- Validate MFA enforcement across all users
- Analyze sign-in logs for anomalies or risky patterns
- Review privileged role assignments
- Validate guest access and external collaboration settings
- Identity governance assessment report
- Privileged access summary
- Identity readiness summary

Permissions & Data Access Review

Analyze oversharing, inheritance issues, and data exposure risks that impact Copilot

- Export SharePoint and OneDrive permissions baseline
- Identify overshared sites, libraries, and folders
- Identify broken permission inheritance
- Analyze Teams and SharePoint mapping for exposure risks
- Review external sharing and guest access exposure
- Permissions exposure report
- Oversharing risk matrix
- Data access readiness summary

Security & Compliance Controls Review

Validate security, compliance, and data protection controls required for Copilot

- Review sensitivity labels and label policies for Copilot compatibility
- Analyze DLP policies and potential Copilot conflicts
- Review retention labels and retention policies

- Validate audit logging and monitoring configuration
- Review insider risk management settings
- Security & compliance assessment report
- Labeling and DLP readiness summary
- Security & compliance readiness package

Copilot Technical Readiness Review

Evaluate Copilot-specific technical dependencies and configuration

- Validate Microsoft Search index health
- Review semantic index readiness
- Validate content discoverability across workloads
- Identify Copilot-blocking misconfigurations
- Review Copilot admin settings and feature availability
- Copilot technical readiness report
- Search and semantic index health summary
- Technical readiness summary

Recommendations & Roadmap

Build the prioritized remediation plan for safe Copilot deployment

- Prioritize risks based on impact and effort
- Define required security, compliance, and governance updates
- Define permissions cleanup and oversharing remediation
- Define Copilot-specific configuration changes
- Build phased rollout plan
- Remediation roadmap
- Quick wins list
- Copilot readiness roadmap package

Handoff & Documentation

Deliver final readiness package and transition ownership

- Compile final readiness assessment report
- Upload documentation to client portal
- Provide admin training on Copilot readiness
- Close project in workflow engine
- Final readiness assessment report
- Remediation roadmap package
- Training materials

KEY FEATURES

- High-demand service
- Security-first
- Fast turnaround
- Clear deployment path

INVESTMENT

\$5,000 - \$8,000 USD

Typical engagement: 2 weeks

Price may vary based on complexity, scope, and organizational size.

Expedited delivery available upon request.
