

M365 Tenant Health Audit

Know exactly what's wrong -- and what it will cost if you don't fix it.

Shane McCaw Consulting

Lead Microsoft 365 Architect

shanemccaw.com/micro-offers/tenant-health-audit

June 30, 2026

OVERVIEW

A comprehensive NASA-methodology assessment of your Microsoft 365 tenant, covering configuration, identity, access, licensing, security posture, compliance gaps, Teams/SharePoint architecture, and governance maturity.

WHAT'S INCLUDED

Assessment & Discovery

- 20-30 page written assessment
- Full configuration review
- IAM & licensing analysis
- Security & compliance review
- Full tenant analysis
- Licensing optimization review

Governance & Security

- Governance maturity scoring

Strategy & Roadmap

- Prioritized remediation roadmap
- Remediation roadmap

Additional Deliverables

- 60-minute executive briefing
- Executive briefing

ENGAGEMENT PHASES

Phase 1: App Registration & Automated Discovery Initialization

Customer configures Azure app registration; engineer verifies credentials and launches automated discovery scripts across the entire M365 tenant.

- M365 Score Profile

Phase 2: Automated Security & Compliance Assessment

Automated scripts audit security configuration, threat protection, compliance policies, audit logs, and generate preliminary security posture scores.

- Audit Azure AD security settings and sign-in risk policies
- Assess MFA enforcement and authentication method deployment
- Audit Exchange Online security policies and threat protection status
- Assess Microsoft Defender for M365 configuration and coverage
- Collect Data Loss Prevention (DLP) policies and endpoint protection status
- Audit Purview compliance policies and data governance configuration
- Analyze audit logs for security events and anomalies
- Generate preliminary security posture scoring against NASA FISMA guidelines

Phase 3: Automated Identity, Access & Licensing Analysis

Automated scripts perform deep analysis of IAM configuration, access rights, licensing optimization, and generate detailed scoring reports.

- Audit Azure AD application registrations and service principals
- Analyze role-based access control (RBAC) and privileged identity assignments
- Assess delegated permissions and application consent status
- Analyze guest user access policies and external sharing configuration
- Perform licensing utilization analysis across all M365 SKUs
- Generate licensing optimization recommendations and cost analysis
- Score identity maturity against industry best practices and compliance frameworks

Phase 4: Automated Governance & Architecture Assessment

Automated scripts analyze Teams/SharePoint governance, information architecture, retention policies, and governance maturity scoring.

- Analyze Teams channel structure, naming conventions, and governance policies
- Assess SharePoint site collection governance and permission inheritance
- Audit OneDrive provisioning and file sharing policies
- Collect retention policies and information lifecycle management configuration

- Analyze Teams and SharePoint backup and disaster recovery readiness
- Score governance maturity across identity, data, and workload domains
- Generate governance architecture recommendations aligned with ITIL and COBIT frameworks

Phase 5: Comprehensive Assessment Report Generation

Engineer synthesizes all automated analysis outputs into a 20-30 page executive-grade assessment document with prioritized findings and roadmap.

- Compile executive summary with key risk findings and governance maturity scores
- Generate detailed security posture assessment section with control scoring
- Generate identity and access management (IAM) analysis section
- Generate licensing optimization and cost analysis section
- Generate compliance framework alignment assessment section
- Generate Teams and SharePoint governance architecture assessment section
- Create prioritized remediation roadmap with NASA-methodology risk scoring
- Generate supporting data tables, charts, and configuration reference appendices
- Generate executive briefing deck (15-20 slides) with key findings and recommendations
- Review and validate all automated findings for accuracy and completeness

Phase 6: Executive Briefing & Findings Delivery

Engineer delivers 60-minute executive briefing to customer stakeholders covering key findings, risk scores, governance maturity assessment, and prioritized remediation roadmap.

- Schedule 60-minute executive briefing with customer stakeholders
- Present executive summary and key risk findings
- Present governance maturity scores and NASA-methodology assessment results
- Present prioritized remediation roadmap with business impact and effort estimation
- Present licensing optimization and cost-savings opportunities
- Address customer questions and clarify findings
- Deliver final 20-30 page assessment document to customer
- Deliver executive briefing deck to customer

Phase 7: Roadmap Refinement & Handoff

Engineer refines remediation roadmap based on customer feedback, provides implementation guidance documentation, and transitions to customer ownership.

- Incorporate customer feedback into prioritized remediation roadmap
- Generate detailed implementation guidance for each prioritized remediation initiative
- Create technical reference architecture diagrams for proposed governance improvements
- Generate scripted assessment tools for ongoing monitoring and compliance tracking
- Create governance maturity tracking dashboard configuration for customer
- Document all assessment methodology, data sources, and scoring criteria
- Schedule post-engagement 30-day check-in meeting to review implementation progress
- Transition all assessment artifacts, automation scripts, and ongoing monitoring tools to customer

KEY FEATURES

- NASA-grade assessment
- Fast turnaround
- Clear prioritization
- Compliance-focused

INVESTMENT

\$4,500 - \$7,500 USD

Typical engagement: 2 weeks

Price may vary based on complexity, scope, and organizational size.

Expedited delivery available upon request.

WHY THIS SERVICE MATTERS

Mid-market organizations (200-1,500 employees) with organic M365 growth.
